

Dera Clients,

Under certification Green Key, the first international environmental label for tourist accommodation and catering, we wanted to share with you some simple eco-gestures that we encourage you to adopt on a daily basis, that will make a difference.

Together let's protect life, let's protect the Earth.

Waste

- 1 ton of recycled paper allows 16 trees to remain standing.
- Don't forget to sort your waste.
- Drop off your batteries at the reception desk.
- To avoid wasting and throwing away food, please only serve yourself portions that you will be able to consume in full.

Energy

- Turn off unnecessary lights.
- Unplug your computers and chargers and switch off your TV when not in use.
- Switch off the air conditioning in rooms or bedrooms when not in use or unoccupied.
- Close windows when leaving your room.

Water

- Save 5 litres of water by turning off the water when brushing your teeth or washing your hands.
- Save up to 30 litres of water by turning off the water while soaping up.
- When flushing the toilet, press the small button (3 litre tanks instead of 6 litres).

Eco-tourism

- During your stay, contribute to the local economy by consuming fresh, local, and seasonal products.
- Discover the local and sustainable activities.
- Choose sustainable means of transport such as bicycles, trams or simply by walking.
